EDUCATION

NED University of Engineering and Technology (CGPA: 3.32 / 4.00)

Karachi (2022–Present)

- Bachelor of Science (Computer Science & Information Technology)

WORK EXPERIENCE

QBS Co.

Associate Software Engineer

(Feb 2026 – Present)

- Developing platform modules for **VersEye**, including **IAM Console**, **Analytics Dashboard** (9 KPIs), and **Model Management**.
- Building frontend systems with **Next.js** in a **Monorepo** and integrating APIs from backend services.
- Collaborating across teams to deliver enterprise-grade full-stack features.

QBS Co.

Trainee Software Engineer

(Nov 2025 – Jan 2026)

- Developed full-stack modules for **VersEye**, including the **Workspace** module and **Footfall** tracking features.
- Built backend microservices using **Docker**, **gRPC**, and **CQRS** for scalable and modular service integration.
- Delivered production-ready services for **Ajeeks**, including a **WhatsApp automation service** and a **Neo4j**-based recommendation engine.

KoderLabs

Associate Software Engineer

(Mar 2025 – Oct 2025)

- Developed backend APIs with **NestJS** and **.NET**, focusing on scalability and **Clean Architecture**.
- Worked on **multi-tenant systems**, optimized database schemas, and integrated **Google Maps API** with **PostGIS**.
- Implemented cloud & real-time features using **AWS S3**, **Azure Functions**, and **SignalR**.

PROJECTS

TrackWise – Smart Personal Finance Platform

(May 2025 – Present)

- Developed a full-stack platform (**NestJS**, **PostgreSQL**, **Angular**) with the **Goal/Savings module**.
- Integrated AI-driven **income/expense categorization** and automated notifications via **MailService**.
- Deployed on **Vercel** (frontend) and **Render** (backend) with **Azure PostgreSQL**, enabling secure, high-availability operations.

CourseFlow – Smart Course Scheduler

(Dec 2024 - Jan 2025)

- Developed a **Flask-based scheduler** for automated classroom allocation and conflict-free timetable generation.
- Applied **Greedy & Backtracking algorithms** and an **admin dashboard** to optimize scheduling efficiency and accuracy.

Stock Management System

(Jun 2024 - Jul 2024)

- Built a **Python-Flask web application** for real-time inventory, sales, and purchase management.
- Automated stock updates, low-stock alerts, and reporting dashboards, improving operational efficiency and reducing manual errors.

SKILLS

Languages & Frameworks

- Python, TypeScript, JavaScript, C#, .NET Core, NestJS, Flask, Next.js

Databases & DevOps

- PostgreSQL, MySQL, Entity Framework, Docker, AWS S3, Azure (Functions, SignalR, Triggers)

Architecture & Tools

- REST APIs, gRPC, Clean Architecture, Microservices, Git, Postman, Swagger, GitHub Copilot, Claude, Cursor

TECHNICAL COMPETITIONS

- Advanced to **Round 2 of KODERZ COMBAT** and competed in **Game of Codes V**, solving **real-time algorithmic challenges** in **Python** and **C++** under competitive conditions.
- Strengthened **data structures and algorithms** by solving **240+ problems on LeetCode** and practicing consistently on HackerRank, demonstrating strong problem-solving consistency.
